WEIGHING BAT 2 - RABBITS

A specific weighing device for rabbits

The monitoring of the animals weight evolution is important. It is possible to check the good functioning of your breeding by controlling this parameter.

BAT 2 - RABBITS : The automatic weighing of rabbits

Installed in the building, the BAT 2 - RABBITS records the weight of all animals that pass on the dedicated weighing pan.

Its back-up memory enables to render and display data and statistics on its adapted graphic screen.

The dedicated PC software, optional, offers you even more information to refine your analyses and follow the performance of your farm, as closely and precisely as possible.

Saving time

The BAT 2 - RABBITS weighing device can carry out several hundreds of weighings every day, depending on the number of animals stopping on the weighing pan.

High passage on scale's platform allows to have very precise and automatic weight calculations.

Animal hygiene and well-being

Gratings from company CHABEAUTI as weighing pan ensures good hygiene and limits droppings.

BAT 2 - RABBIT weighing device also provide animals' well-being by enriching their environment.

- Suspended weighing pan made of gratings,
- Approximately one year of internal memory with 1000 recordings per day.,
- Graphic LCD display,
- Automatic recording of weighings,

- Possible configuration of weighing criteria: Minimal and maximal weight limits.
- 230V Power Supply,
- PC Software with memory module (optional),
- GSM transmission of statistics on your phone (optional).
